CLASS DESCRIPTION

10. Freeze protection requirements and options (dry systems, heat tape, etc..)

Date: September 20, 2016

Time: 8 am to 5 pm

Duration: 8 Hours

Course Synopsis:

This 8-hour course will cover the NFPA standards requiring water-based fire protection systems to be protected against freezing. Examining the conditions that trigger mandatory freeze protection along with the approved options for meeting the requirement. The design limitations and economic impact (including maintenance) of using dry pipe systems, preaction systems, insulation, heat tracing, antifreeze solutions, and other potential protection methods will be examined.

Review items to be considered when making a choice on how best to provide adequate protection. Identify the consequences of inadequate freeze protection versus the building owners need for dependable and cost-effective fire protection.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 10 will be held at: Kittitas Valley Fire & Rescue
2020 Vantage Hwy
Ellensburg, WA 98926

Instructor: Fire Smarts, LLC

10. Freeze protection requirements and options (dry systems, heat tape, etc..)	September 20, 2016 8 AM to 5 PM	Kittitas Valley Fire & Rescue 2020 Vantage Hwy Ellensburg, WA 98926	

There is no cost to attend this training.
All training offered is eligible for ICC CEU's.

USE THIS REGISTRATION FORM ONLY FOR THE CLASSES SHOWN

How to Register for Training:

1. Print clearly, completing all fields. One student and one course per registration form.
2. Return to the State Fire Marshal's Office (SFMO) no less than 15 calendar days prior to the course. This can be done by e-mailing the form to firesprinkler@wsp.wa.gov or faxing it to (360) 596-3934.
3. Training spots are given on a first come, first serve basis.
4. An e-mail confirmation will be sent no later than 10 days prior to the training.
 - Attendance is limited to the number of seats offered per course.
 - You **MUST** register with the SFMO to attend.
 - **No Walk-Ins** will be allowed.
5. If you are unable to attend the training after completing registration, please notify the SFMO as soon as possible. The next person selected will come from a waiting list.
6. Courses with less than 10 students will be cancelled. This notice will be given no later than 5 days before the course. You will be notified via e-mail or phone.
7. To obtain CEU credits or a Certificate of Attendance, you need to attend the entire training course.
8. Check the course description to see if you need to bring an NFPA standard. They will not be provided at the training.

CLASS DESCRIPTION

11. Fire Alarm Interconnectivity to the Fire Sprinkler System

Date: September 21, 2016

Time: 8 am to 5 pm

Duration: 8 Hours

Course Synopsis:

This is 8-hour course will cover the interconnectivity of a fire sprinkler system and the fire alarm systems. Fire Inspections are required to ensure that critical building systems will function if they are needed. There are methods that will be discussed that will address how to comply with the requirements and describe some of the misunderstandings of the codes that apply to the testing and inspection of fire protection systems and how the code is laid out.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 11 will be held at: Kittitas Valley Fire & Rescue
2020 Vantage Hwy
Ellensburg, WA 98926

Instructor: Fire Smarts, LLC

CLASS DESCRIPTION

14. Fire Pump Testing and Analysis

Date: October 4th 2016

Time: 8 am to 12 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour course focuses on stationary fire pumps and the requirements of the 2013 edition of NFPA 20. This lecture-based seminar discusses pump types, electric motor and diesel engine drivers along with their associated controllers. The installation requirements for fire pumps are also reviewed. Upon completion of this course, participants should be able to: explain the organization of NFPA 20 describe the various types of fire pumps, locate and apply the basic installation requirements for stationary fire pumps, drivers, and controllers. This seminar benefits anyone who specifies, installs, or inspects stationary fire pumps.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: 2013 NFPA 20

Class 14 will be held at: South King County Fire Training Consortium
20811 84th Ave South, Suite 102
Kent, WA 98032

Instructor: Fire Smarts, LLC

CLASS DESCRIPTION

15. Internal Piping Assessment and Obstruction Investigation

Date: October 4th 2016

Time: 1 pm to 5 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour course covers NFPA 25, Chapter 14 requirements how to conduct an internal piping assessment and obstruction investigation. Determining which system this applies to and if an alternative method to conduct the internal assessment is available. How to identify the types of internal piping issues that can cause an obstruction such as internal corrosion and what impacts it could have on the fire sprinkler system.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: 2013 NFPA 20

Class 15 will be held at: South King County Fire Training Consortium
20811 84th Ave South, Suite 102
Kent, WA 98032

CLASS DESCRIPTION

16. NFPA 24 – Fire Service Mains and their Appurtenances (Underground)

Date: October 5th 2016

Time: 8 am to 12 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour course uses the 2013 edition of NFPA 24 Standard for the Installation of Private Fire Service Mains and their Appurtenances which contains the latest requirements and information regarding the installation of underground water supply piping for fire protection systems.

This course examines the requirements for the components used in these systems along with the installation requirements. Chapter 10 of NFPA 13 is an extract of the material found in NFPA 24 but does not include fire hydrants, hose houses, and other system devices.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: This course covers material from the 2013 edition of NFPA 24 (not included).

Class 16 will be held at: South King County Fire Training Consortium
20811 84th Ave South, Suite 102
Kent, WA 98032

Instructor: Fire Smarts, LLC

CLASS DESCRIPTION

17. NFPA 25 – Step by Step Testing Procedures

Date: October 5th 2016

Time: 1 pm to 5 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour seminar discusses the challenges facing contractors where NFPA 25 is the adopted standard, but state and local AHJs request or mandate inspections and/or tests that are not aligned with the requirements of the standard.

Explain strategies used by others to minimize the liability and to mitigate the conflicts that result when dealing with these “out of scope” requests. How to follow NFPA 25 testing procedures to protect yourself and your company by increasing your skill in helping your AHJ properly apply NFPA 25.

The issue of contractor and owner liability is discussed in detail. The layout of the standard is reviewed and the scope of inspections, tests, and maintenance is reviewed for major systems including sprinklers, standpipes, and fire pumps.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 17 will be held at: South King County Fire Training Consortium
20811 84th Ave South, Suite 102
Kent, WA 98032

Instructor: Fire Smarts, LLC

17. NFPA 25 – Step by Step Testing Procedures	October 5, 2016 1 PM to 5 PM	South King County Fire Training Consortium 20811 84 th Ave South, Suite 102 Kent, WA 98032	

There is no cost to attend this training.
All training offered is eligible for ICC CEU's.

USE THIS REGISTRATION FORM ONLY FOR THE CLASSES SHOWN

How to Register for Training:

1. Print clearly, completing all fields. One student and one course per registration form.
2. Return to the State Fire Marshal's Office (SFMO) no less than 15 calendar days prior to the course. This can be done by e-mailing the form to firesprinkler@wsp.wa.gov or faxing it to (360) 596-3934.
3. Training spots are given on a first come, first serve basis.
4. An e-mail confirmation will be sent no later than 10 days prior to the training.
 - Attendance is limited to the number of seats offered per course.
 - You **MUST** register with the SFMO to attend.
 - **No Walk-Ins** will be allowed.
5. If you are unable to attend the training after completing registration, please notify the SFMO as soon as possible. The next person selected will come from a waiting list.
6. Courses with less than 10 students will be cancelled. This notice will be given no later than 5 days before the course. You will be notified via e-mail or phone.
7. To obtain CEU credits or a Certificate of Attendance, you need to attend the entire training course.
8. Check the course description to see if you need to bring an NFPA standard. They will not be provided at the training.

CLASS DESCRIPTION

18. NFPA 20 – Fire pumps for fire protection, layout and sizing

Date: October 11 & 12, 2016

Time: 8 am to 5 pm

Duration: 16 Hours

Course Synopsis:

This 16-hour course provides a detailed review of the design, installation, and acceptance testing of stationary fire pumps. The seminar begins with a review of basic pump principles including laminar and balanced flow along with basic hydraulic principles. The difference between centrifugal and positive displacement pumps will be examined.

Students will learn about the various types of centrifugal fire pumps and how each are best applied. The performance requirements, selection and sizing of pumps will be discussed with hands-on activities to give experience in choosing the most cost effective fire pump. Installation requirements will be thoroughly reviewed with illustrations of acceptable and unacceptable layouts. The purpose of pressure maintenance (jockey) pumps will be thoroughly examined including methods for choosing the correct capacity.

Selection, type and general discussion regarding pumps used in smaller commercial applications versus multiple story skyscrapers.

The requirement for motor drivers, engine drivers, and their controllers will be examined. Finally, the seminar examines the requirements for acceptance testing and the required documentation for an approved fire pump installation.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: This course requires student to have a copy of the 2013 edition of NFPA 20 (not included).

Class 18 will be held at: Woodinville Fire & Rescue Station 31
17718 Woodinville Snohomish Rd
Woodinville, WA 98072

Instructor: Fire Smarts, LLC

CLASS DESCRIPTION

19. Hydraulic Calculations for Fire Sprinkler Systems - Intermediate

Date: November 8, 2016 **Time:** 8 am to 12 pm **Duration:** 4 Hours

Course Synopsis:

This 4-hour course introduces the participants to the basics of hydraulic calculations including sprinkler operating pressure, elevation pressure, and friction-loss. This course will examine the density/area approach to determine design criteria including water demand for sprinklers and hose allowance.

A review of the common system configurations is conducted examining the benefits of each. The requirements for performing hydraulic calculations as per NFPA 13 are discussed including the required forms, C-values, and equivalent lengths.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 19 will be held at: Woodinville Fire & Rescue Station 31
17718 Woodinville Snohomish Rd
Woodinville, WA 98072

CLASS DESCRIPTION

20. Hydraulic Calculations for Fire Sprinkler Systems - Advanced

Date: November 8, 2016 **Time:** 1 pm to 5 pm **Duration:** 4 Hours

Course Synopsis:

This 4-hour course builds on Course One by reviewing hydraulic principles for calculating specific application sprinklers using minimum K-factors and pressure. The principles for determining the hydraulically most demanding area are reviewed along with changing the sprinkler area of coverage, density, and orifice size to find the most efficient system layout and configuration. The calculation concepts for using looped and gridded configurations are examined.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 20 will be held at: Woodinville Fire & Rescue Station 31
17718 Woodinville Snohomish Rd
Woodinville, WA 98072

CLASS DESCRIPTION

21. Seismic Protection for Fire Sprinkler Systems – Intermediate

Date: November 9, 2016

Time: 8 am to 12 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour course is on seismic protection for fire sprinkler systems is a fact of life for many locations. This course is designed for those who have an understanding of seismic terms with a focus on the proper application of the requirements for seismic protection. The content is based on the 2013 edition of NFPA 13.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 21 will be held at: Woodinville Fire and Rescue
17718 Woodinville Snohomish Rd NE
Woodinville, WA 98072

Instructor: Fire Smarts, LLC

CLASS DESCRIPTION

22. Seismic Protection for Fire Sprinkler Systems – Advanced

Date: November 9, 2016

Time: 1 pm to 5 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour course is designed for those who have a solid understanding of seismic terms and application of flexibility, clearance, and bracing. Attendees of the session will learn to apply the concepts of lateral and horizontal loads, determine the zone of influence, and the calculation and layout of seismic bracing. The content is based on the 2013 edition of NFPA 13.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 22 will be held at: Woodinville Fire & Rescue
17718 Woodinville Snohomish Road NE
Woodinville, WA 98072

CLASS DESCRIPTION

23. Fire Sprinkler System Requirements for Storage

Date: November 29, 2016

Time: 8 am to 5 pm

Duration: 8 Hours

Course Synopsis:

This 8-hour course covers fire sprinkler system requirements for storage as it is one of the most challenging fire protection scenarios. This course is based on the 2013 edition of NFPA 13 and reviews the key decision points to apply an approved design option for fire sprinkler use with storage applications.

Utilizing an interactive teaching method, this seminar follows the path that an engineer, designer, or AHJ uses when evaluating storage protection. The foundational questions of "What is being stored?", "How is it stored?", and "How high is it stored?" are reviewed in detail. Once these questions are answered, the various design approaches are considered to determine the best solution for the particular scenario. The seminar ends with a hands-on activity using the information shared in the course.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 23 will be held at: Glenwood Fire Station 7
12603 NE 72nd Ave

CLASS DESCRIPTION

25. Freeze protection requirements and options (dry systems, heat tape, etc..)

Date: December 6, 2016

Time: 8 am to 5 pm

Duration: 8 Hours

Course Synopsis:

This 8-hour course will cover the NFPA standards requiring water-based fire protection systems to be protected against freezing. Examining the conditions that trigger mandatory freeze protection along with the approved options for meeting the requirement. The design limitations and economic impact (including maintenance) of using dry pipe systems, preaction systems, insulation, heat tracing, antifreeze solutions, and other potential protection methods will be examined.

Review items to be considered when making a choice on how best to provide adequate protection. Identify the consequences of inadequate freeze protection versus the building owners need for dependable and cost-effective fire protection.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 25 will be held at: Lynnwood Fire Department
18800 44th Avenue West
Lynnwood, WA 98046

CLASS DESCRIPTION

26. Fire Alarm Interconnectivity to the Fire Sprinkler System

Date: December 7, 2016

Time: 8 am to 5 pm

Duration: 8 Hours

Course Synopsis:

This is 8-hour course will cover the interconnectivity of a fire sprinkler system and the fire alarm systems. Fire Inspections are required to ensure that critical building systems will function if they are needed. There are methods that will be discussed that will address how to comply with the requirements and describe some of the misunderstandings of the codes that apply to the testing and Inspection of fire protection systems and how the code is laid out.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 26 will be held at: Lynnwood Fire Department
18800 44th Ave West
Lynnwood, WA 98046

All training offered is eligible for ICC CEU's.

USE THIS REGISTRATION FORM ONLY FOR THE CLASSES SHOWN

How to Register for Training:

1. Print clearly, completing all fields. One student and one course per registration form.
2. Return to the State Fire Marshal's Office (SFMO) no less than 15 calendar days prior to the course. This can be done by e-mailing the form to firesprinkler@wsp.wa.gov or faxing it to (360) 596-3934.
3. Training spots are given on a first come, first serve basis.
4. An e-mail confirmation will be sent no later than 10 days prior to the training.
 - Attendance is limited to the number of seats offered per course.
 - You **MUST** register with the SFMO to attend.
 - **No Walk-Ins** will be allowed.
5. If you are unable to attend the training after completing registration, please notify the SFMO as soon as possible. The next person selected will come from a waiting list.
6. Courses with less than 10 students will be cancelled. This notice will be given no later than 5 days before the course. You will be notified via e-mail or phone.
7. To obtain CEU credits or a Certificate of Attendance, you need to attend the entire training course.
8. Check the course description to see if you need to bring an NFPA standard. They will not be provided at the training.

CLASS DESCRIPTION

27. Fire Pump Testing and Analysis

Date: December 13, 2016

Time: 8 am to 12 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour course focuses on stationary fire pumps and the requirements of the 2013 edition of NFPA 20. This lecture-based seminar discusses pump types, electric motor and diesel engine drivers along with their associated controllers. The installation requirements for fire pumps are also reviewed. Upon completion of this course, participants should be able to: explain the organization of NFPA 20 describe the various types of fire pumps, locate and apply the basic installation requirements for stationary fire pumps, drivers, and controllers. This seminar benefits anyone who specifies, installs, or inspects stationary fire pumps.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: 2013 NFPA 20

Class 27 will be held at: Moses Lake Fire Department
701 East Third Ave
Moses Lake, WA 98837

Instructor: Fire Smarts, LLC

CLASS DESCRIPTION

28. Internal Piping Assessment and Obstruction Investigation

Date: December 13, 2016

Time: 1 pm to 5 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour course covers NFPA 25, Chapter 14 requirements how to conduct an internal piping assessment and obstruction investigation. Determining which system this applies to and if an alternative method to conduct the internal assessment is available. How to identify the types of internal piping issues that can cause an obstruction such as internal corrosion and what impacts it could have on the fire sprinkler system.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 28 will be held at: Moses Lake Fire Department
701 East Third Ave
Moses Lake, WA 98837

Instructor: Fire Smarts, LLC

CLASS DESCRIPTION

29. NFPA 24 – Fire Service Mains and their Appurtenances (Underground)

Date: December 14, 2016

Time: 8 am to 12 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour course uses the 2013 edition of NFPA 24 Standard for the Installation of Private Fire Service Mains and their Appurtenances which contains the latest requirements and information regarding the installation of underground water supply piping for fire protection systems. This course examines the requirements for the components used in these systems along with the installation requirements. Chapter 10 of NFPA 13 is an extract of the material found in NFPA 24 but does not include fire hydrants, hose houses, and other system devices.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: This course covers material from the 2013 edition of NFPA 24 (not included).

Class 29 will be held at: Moses Lake Fire Department
701 East Third Ave
Moses Lake, WA 98837

Instructor: Fire Smarts, LLC

CLASS DESCRIPTION

30. NFPA 25 – Step by Step Testing Procedures

Date: December 14, 2016

Time: 1 pm to 5 pm

Duration: 4 Hours

Course Synopsis:

This 4-hour seminar discusses the challenges facing contractors where NFPA 25 is the adopted standard, but state and local AHJs request or mandate inspections and/or tests that are not aligned with the requirements of the standard.

Explain strategies used by others to minimize the liability and to mitigate the conflicts that result when dealing with these “out of scope” requests. How to follow NFPA 25 testing procedures to protect yourself and your company by increasing your skill in helping your AHJ properly apply NFPA 25.

The issue of contractor and owner liability is discussed in detail. The layout of the standard is reviewed and the scope of inspections, tests, and maintenance is reviewed for major systems including sprinklers, standpipes, and fire pumps.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: N/A

Class 30 will be held at: Moses Lake Fire Department

CLASS DESCRIPTION

6. NFPA 20 – Fire pumps for fire protection, layout and sizing

Date: August 9 & 10, 2016

Time: 8 am to 5 pm

Duration: 16 Hours

Course Synopsis:

This 16-hour course provides a detailed review of the design, installation, and acceptance testing of stationary fire pumps. The seminar begins with a review of basic pump principles including laminar and balanced flow along with basic hydraulic principles. The difference between centrifugal and positive displacement pumps will be examined.

Students will learn about the various types of centrifugal fire pumps and how each are best applied. The performance requirements, selection and sizing of pumps will be discussed with hands-on activities to give experience in choosing the most cost effective fire pump. Installation requirements will be thoroughly reviewed with illustrations of acceptable and unacceptable layouts. The purpose of pressure maintenance (jockey) pumps will be thoroughly examined including methods for choosing the correct capacity.

Selection, type and general discussion regarding pumps used in smaller commercial applications versus multiple story skyscrapers.

The requirement for motor drivers, engine drivers, and their controllers will be examined. Finally, the seminar examines the requirements for acceptance testing and the required documentation for an approved fire pump installation.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: This course requires student to have a copy of the 2013 edition of NFPA 20 (not included).

CLASS DESCRIPTION

7. Preparing for the NICET Exam – NFPA 25 - Inspection, Testing & Maintenance of Water-Based Fire Protection Systems

Date: August 23 & 24, 2016

Time: 8 am to 5 pm

Duration: 16 Hours

Course Synopsis:

This 16-hour course is focused on preparing successful completion of the NICET examination requirements for NICET certification through Level II for the inspection and testing of water-based suppression systems. This seminar is focused on the understanding and use of NFPA 25. NFPA 25 is the only document allowed to be referenced while taking the examinations. In addition, basic inspector procedures and safety requirements are reviewed.

Class will provide a timed practice exam of between 100 and 200 questions to give students a hands-on experience of using NFPA 25 under exam-like conditions.

Note: Students will provide their own copy of NFPA 25. Vendor to specify which edition of NFPA should be brought to the course.

Audience: Contractors, COC's, AHJ

Required NFPA Standard: This course requires student to have a copy of the 2013 edition of NFPA 25 (not included).

CLASS DESCRIPTION

8. Fire Sprinkler Plan Review for Plan Reviewers (AHJ's)

Date: September 13, 2016

Time: 8 am - 5 pm

Duration: 8 Hours

Course Synopsis:

This 8-hour course is geared toward the AHJ and takes attendees through a step-by-step review of fire sprinkler working drawings, the accompanying hydraulic calculations, and the requirements for acceptance testing of the system. The approval of fire sprinkler systems includes a review of the design documents and an onsite verification of the completed system. This course utilizes the requirements found in the 2013 editions of NFPA 13 and 13R. Attendees will work with an actual fire sprinkler working plan and the accompanying hydraulic calculations.

Audience: COC's, AHJ

Required NFPA Standard: This course covers material from the 2013 editions of NFPA 13 and NFPA 13R (not included).
